Data Visualization

NBA Team Performance Over the Years

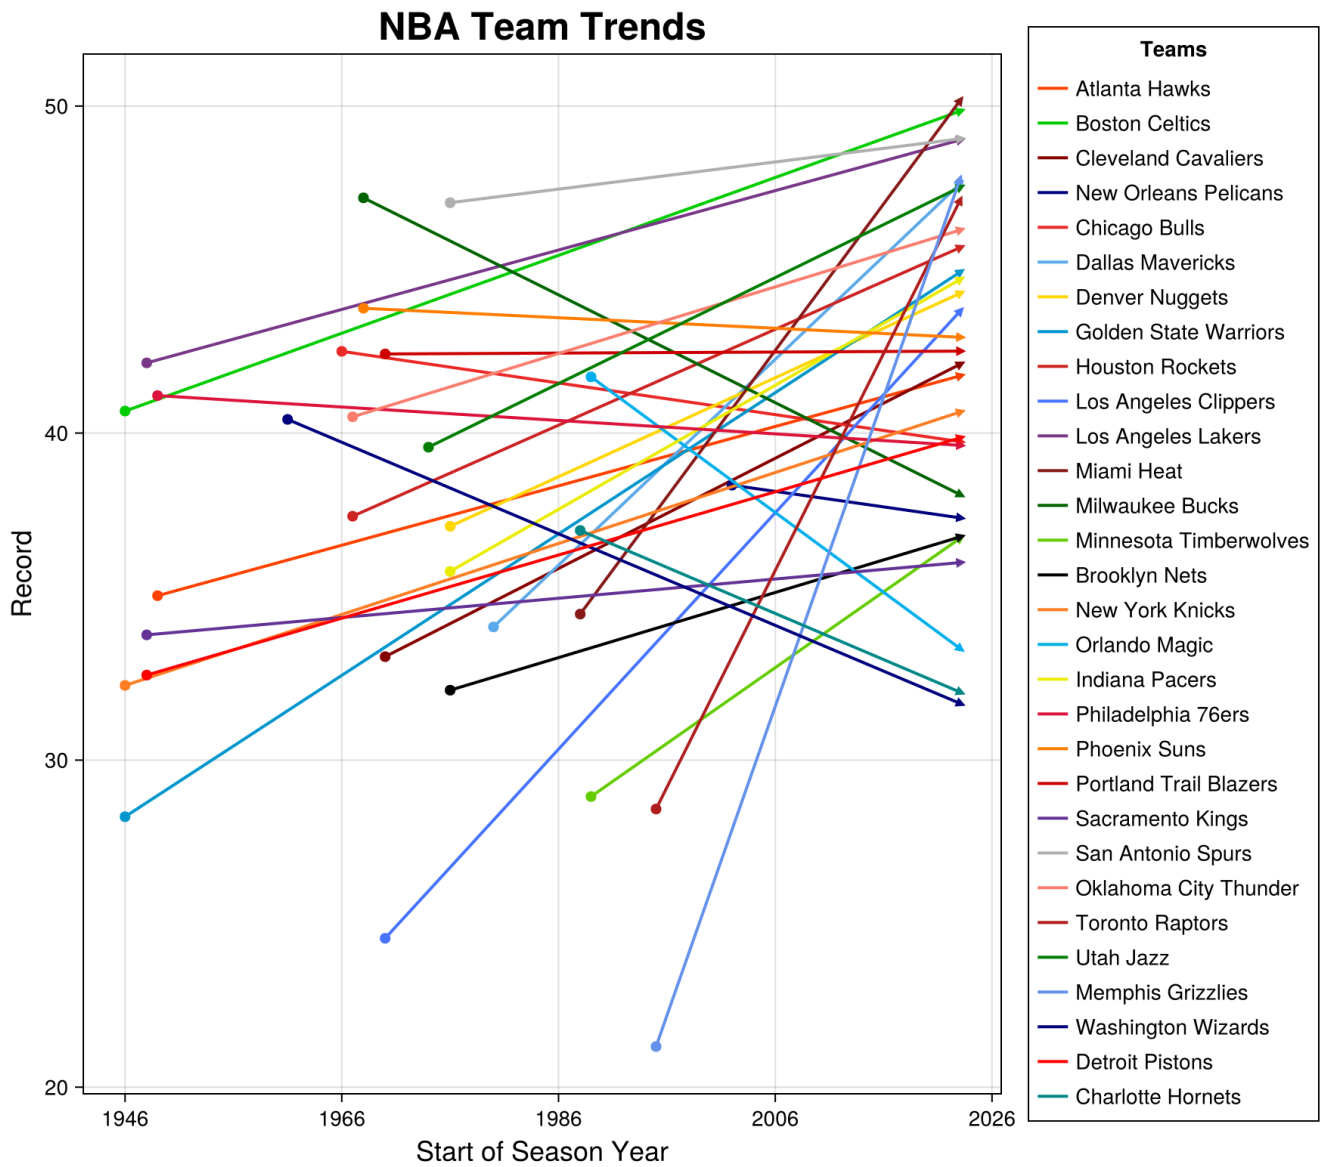

These bar graphs show when teams were inaugurated, re-franchised (Charlotte), and their records throughout the years.

Source: NBA License, NBA, 2021.

This line graph shows the overall trend of each team's performance (fit to a first degree polynomial).

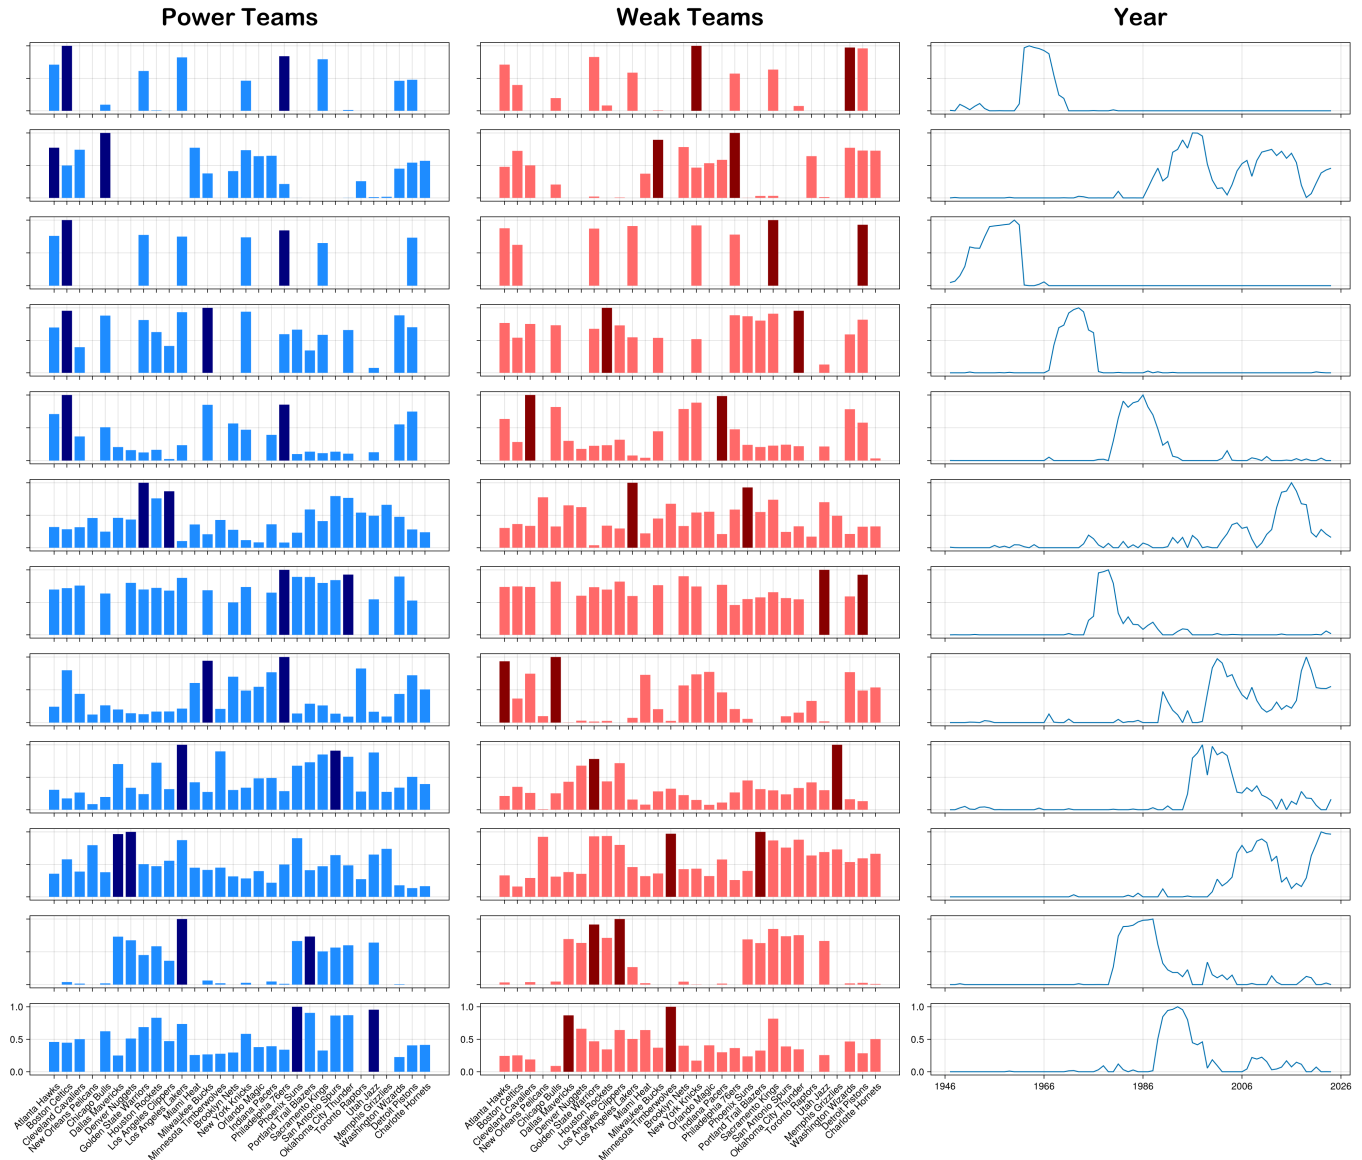

This heatmap is a visually easier graph for determining the prime eras for each team and their inaugural years.

Third Order Tensor Decomposition

```
M = 30×30×78 CPD{Float64, 3, Vector{Float64}, Matrix{Float64}} with 12 components
λ weights:
12-element Vector{Float64}: ...
U[1] factor matrix:
30×12 Matrix{Float64}: ...
U[2] factor matrix:
30×12 Matrix{Float64}: ...
U[3] factor matrix:
78×12 Matrix{Float64}: ...
```

```
1 M = gcp(X,12;loss = GCPLosses.NonnegativeLeastSquares())
```

NBA Regular Season Tensor Decomposition

This tensor decomposition accurately predicts the NBA champions throughout the years. It captures the Bull's dominance in the 90s, Heat short after, Celtics in the 60s and currently, Lakers in the 2000s, 80s, and 50s, Warriors in the late 2010s, and the upcoming Nuggets, Mavericks, etc... showcasing its versatility and usage in statistics.
